

# IRENE CARLOTA DEL CUETO MORA

Junior Full Stack Developer

## Contact

k431999@gmail.com
+535-474-1994
La Habana, Cuba
icarlota99.github.io/ICarlota-portfolio/
linkedin.com/in/icarlota99
github.com/icarlota99

## Core skills

- **Programming Languages:** JavaScript, Python, TypeScript, HTML5, CSS3
- **Frontend:** React, Next.js, Vue.js, Tailwind CSS, Bootstrap
- **Backend:** Node.js/Express.js, Python/Flask
- **Databases:** MongoDB, MySQL, PostgreSQL, SQLAlchemy
- **Tools:** Git, GitHub, AWS, Vercel
- Code structure and architecture
- Web performance optimization

## Soft skills

- Problem-solving
- Teamwork
- Time Management
- Effective Communication
- Critical Thinking
- Self-Directed Learning
- Attention to detail

## Education

**CS50x, CS50P, CS50 Web**
eDx | Harvard University 2024-2025

**The Complete Full-Stack Web Development Bootcamp**
Angela Yu | Udemy 2024

**Medical Degree** 2017-2024
Universidad de Ciencias Médicas de La Habana

## Languages

- Spanish (Native)
- English (Fluent)

## About Me

Self-taught web developer with medical background (Havana) applying analytical thinking and structured problem-solving to build reliable, user-focused web applications. Specializes in React frontends and Python/Node.js backends, with AI/LLM exploration. Creates performant, visually compelling solutions through clean code and strong UX/UI principles. Rapid learner thriving in collaborative tech environments.

## Professional Experience

### Full Stack Developer - Helpia / DClick 2025

**Website:** https://www.helpia.com

**Node.js • MongoDB • AWS Lambda • Event Bus • Excel Data Processing • REST APIs • Typescript • React • TailwindCSS**

- Developed and optimized ticket and campaign reporting systems, including large-scale Excel data exports.
- Implemented efficient pagination for large datasets (10k+ contacts) to improve web performance and usability.
- Built processes to import and export data between Excel and MongoDB using BulkWrite for high-volume operations.
- Optimized reporting queries using MongoDB aggregation pipelines and improved API handling for complex filters and large datasets.
- Worked with event-driven architecture using AWS Lambda and Event Bus for scalable data processing.
- Fixed key issues related to contact management, reporting, data export, and authentication tokens.

**Key Archievement:** Improved system reliability by identifying and resolving critical bugs related to reporting, contact management, and authentication.

### PetPal - Full-Stack Pet Care Management System (CS50x Final Project)

**GitHub**: https://github.com/ICarlota99/Pet-Care-app

***Python/Flask • SQLAlchemy • JavaScript • Bootstrap***

- Developed a secure full-stack web app using App Factory Pattern
- Engineered 4 interactive health trackers (weight/vaccine/medication/deworming) with data visualization
- Implemented JWT authentication with password hashing, email validation, and session management
- Built photo gallery with chronological sorting and medical journal with rich text entries

**Key Achievement:** Solved complex data relationship challenges between pets/owners/medical records using normalized SQL database design

### Heladerías Aloha - E-Commerce Ice Cream Shop

**GitHub:** https://github.com/ICarlota99/heladeriasaloha_madryn

***React • JavaScript • Bootstrap • Serverless Architecture***

- Created performant marketing site for local business with 95+ Lighthouse accessibility score
- Integrated WhatsApp API for order submissions, reducing business response time by 70%
- Implemented persistent cart using browser localStorage for abandoned cart recovery

**Key Archievement:** Built zero-maintenance solution hosted on Vercel requiring no backend costs
